

First Name Cassandra

Last Name Geiser

Question/Comment

It's quite obvious that the space and location are already perfect for this to be done where the civic center already is, even taking into consideration preserving the bandshell, there will be more space to work with to ensure the project isn't a. going on in the middle of a residential neighborhood and b. further contesting traffic in the other sites as well as c. Keeping these resources in walking or safe biking distance from downtown. Why change an already proven successful location and disturb the infrastructure? Keep it where it is :) please!
